

For the moments your residents need *a little more.*

Every community has residents living through a moment that asks for more one-on-one attention than daily routines provide. We bring that attention to her, right where she lives: she keeps her apartment, her family keeps their peace of mind, and you keep your resident.

WE ARE WITH YOUR RESIDENTS WHEN...

Transitional Care

Returning from the hospital or rehab — a steady, familiar presence through a change of pace.

Companion Care

A fall, a new diagnosis, a decline — sustained one-on-one attention through the harder days.

Montessori Care +

Lonely, withdrawn, “not themselves” — engagement built around what they can still do and love.

Caring Touch +

Anxious or restless, especially the late afternoons — calm, comfort, and human connection.

Family Respite

Families who can't be there as often as they wish — a trusted presence, so they can rest.

Presence +

Life's final chapter — comfort, dignity, and presence, so no one is alone at the bedside.

HOW PARTNERSHIP WORKS

- 1 **A short introduction meeting** — your community, our model, and the agreement structure.
- 2 **A simple partner agreement** — house rules, communication protocols, referral flow.
- 3 **Referrals with family consent** — families contract with us directly; no cost, no lift.
